

- iii. an interior disposed channel defined by a portion of the first nonwoven layer being joined to the second nonwoven layer, wherein there is little to no absorbent material present within the channel; and
- d. wherein the polymeric bag comprises a communication that the absorbent articles comprise are devoid of at least one of:
 - i. fragrance or perfume;
 - ii. lotion; and
 - iii. chlorine.
- 2. The package of claim 1, wherein the bag comprises a communication that the absorbent articles comprise are devoid of at least two of:
 - i. fragrance or perfume;
 - ii. lotion; and
 - iii. chlorine.
- 3. The package of claim 1, wherein the bag comprises a communication that the absorbent articles comprise are devoid of:
 - i. fragrance or perfume;
 - ii. lotion; and
 - iii. chlorine.
- 4. The package of claim 1, wherein the bag comprises a further communication that the absorbent articles comprise materials made from renewable resources.
- 5. The package of claim 1, wherein each of the absorbent articles comprises a topsheet and a layer intermediate the topsheet and the core wrap, and wherein the layer is formed of the bleached cellulosic fibers.
- 6. The package of claim 1, wherein the absorbent material comprises a mixture of superabsorbent polymer and air felt.
- 7. The package of claim 1, wherein the first nonwoven layer and the second nonwoven layer are made from a single nonwoven material.
- 8. The package of claim 1, wherein the bag has an In-Bag Stack Height of less than 100 millimeters.
- 9. The package of claim 1, wherein the absorbent article comprises a topsheet and an outer cover, and wherein the topsheet and the outer cover comprise plant-based fibers other than wood pulp.
- 10. A package of absorbent articles comprising:
 - a. a package comprising a polymeric bag; and
 - b. a plurality of absorbent articles disposed within the polymeric bag, wherein the absorbent articles are devoid of lotion, fragrance or perfume, and chlorine;
 - c. wherein each of the absorbent articles comprises bleached cellulosic fibers and an absorbent core comprising:
 - i. a core wrap comprising a first nonwoven layer and an opposing second nonwoven layer;
 - ii. absorbent material disposed between the first nonwoven layer and the second nonwoven layer; and
 - iii. an interior disposed channel defined by a portion of the first nonwoven layer being joined to the second nonwoven layer, wherein there is little to no absorbent material present within the channel; and
 - d. wherein the polymeric bag comprises a communication that the absorbent articles comprise are devoid of:
 - i. fragrance or perfume;
 - ii. lotion; and
 - iii. chlorine.
- 11. The package of claim 10, wherein the bag comprises a communication that the absorbent articles comprise are devoid of at least two of:
 - i. fragrance or perfume;
 - ii. lotion; and
 - iii. chlorine.
- 12. The package of claim 10, wherein the bag comprises a communication that the absorbent articles comprise are devoid of:
 - i. fragrance or perfume;
 - ii. lotion; and
 - iii. chlorine.
- 13. The package of claim 10, wherein the bag comprises a further communication that the absorbent articles comprise materials made from renewable resources.
- 14. The package of claim 10, wherein the bag has an In-Bag Stack Height of less than 80 millimeters.
- 15. The package of claim 10, wherein the absorbent material comprises a mixture of superabsorbent polymer and air felt.
- 16. A package of absorbent articles comprising:
 - a. a package comprising a polymeric bag;
 - b. a plurality of absorbent articles disposed within the polymeric bag, wherein the absorbent articles are devoid of lotion, fragrance or perfume, and chlorine;
 - c. wherein each of the absorbent articles comprises bleached cellulosic fibers and an absorbent core comprising:
 - i. a core wrap comprising a first nonwoven layer and an opposing second nonwoven layer;
 - ii. absorbent material disposed between the first nonwoven layer and the second nonwoven layer; and
 - iii. an interior disposed channel defined by a portion of the first nonwoven layer being joined to the second nonwoven layer, wherein there is little to no absorbent material present within the channel; and
 - d. wherein each of the absorbent articles comprises odor management material, wherein the odor management material comprises a mixture of zeolite and silica; and
 - e. wherein the polymeric bag comprises a communication that the absorbent articles are devoid of:
 - i. scent, fragrance or perfume; and
 - ii. chlorine.
- 17. The package of claim 16, wherein the bag comprises a communication that the absorbent articles comprise are devoid of a lotion.
- 18. The package of claim 16, wherein the bag comprises a further communication that the absorbent articles comprise materials made from renewable resources.
- 19. The package of claim 16, wherein the absorbent article comprises a topsheet and an outer cover, and wherein one of the topsheet and the outer cover comprises cotton fibers and the other of the topsheet and the outer cover comprises bio-based synthetic fibers.
- 20. The package of claim 16, wherein the absorbent material comprises a mixture of superabsorbent polymer and air felt.
